

Serial No. 10/732,716

REMARKS

The Office Action dated March 22, 2005 has been carefully studied. Claim 1 has been amended. Claim 2 has been canceled. Reconsideration of this application is respectfully requested.

The drawing has been objected to for element 51 is not described in the specification. Appropriate amendment has been made to the specification in which reference number 5 is now used to designate the lock 5 whereas the main body is now designated by "51". Thus, no drawing correction is required.

Claim 1 has been amended to include the subject matter recognized by Examiner Lugo to be patentable and is believed to be in condition for allowance. It is then respectfully submitted that Claims 1 and 3-6 existing in this application are in condition for allowance.

In view of the foregoing amendments, it is believed that the application is now in condition for allowance and such action is respectfully requested. If any points remain in issue which the Examiner feels could best be resolved by either a personal or telephone interview, he is urged to contact Applicant's attorney at the exchange listed below.

Respectfully submitted,

Mu-Lin Shen
